

# MOONEY

Powered by the WAGMI..tech Think Tank

# What is Mooney?

With Mooney users can seamlessly mint, interact with and exchange NFT's interoperably between different blockchains in a single marketplace.

We're built on GDPR compliant protocols, allowing the marketplace to safely interact with traditional institutions across finance, art, and mainstream media.

## **Protecting Creators**

Our platform simultaneously mints NFT's across different blockchains, which protects creators from getting their material stolen by bad actors.

Mooney is a DAO, meaning there is no possibility of one of the developers blowing up our beloved moon with a nuclear button. The power lies in the hands of the community, so you get your say in where we should land our big moon.

## Innovating on all levels

Users will be able to enjoy innovation from the new world with the security provided from the old world.

In other words, we're going to bring future moon technology to Earth. No need to fly to the moon, we'll bring the moon to you

#### **Fair Redistribution**

#### **MOONY Token**

# 10% Transactional Tax

3% 3% 3% 1%

Gets
Burned Goes to
DAO Redistributed to holders Marine Wildlife
Protection

(We care about our swimmy friends)

#### **Cause Related Incentive Networks**

One of the key concepts around Mooney is finding ways to bridge the gap between real world problems and crypto based solutions. By using 1% of all transactions on the network to fund marine wildlife protection, we create network incentives that allow users to support things they love while utilizing the services the network provides. This concept can be adopted and used by other projects as well to create cause related incentive networks for the ideals that align with their core team's values. Expounding on this, we can see how a DAO could utilize these tools to create an even more dynamic incentive structure between the user base and its passions to help accomplish the goals aligned with the community as a whole. The far reaching implications of this simple concept will become more apparent as the project continues

# Roadmap

Apr 2021 One PHASE

Token Contract Launch

Mooney contract goes live and deployed to network.

Reward Safemoon Holders

All Safemoon holders recieve proportional airdrop based on amount held during snapshot.

Farm Deployment

Activate yield farming based on wrapped Expanse and Mooney pairs

Two PHASE

NFT Minting

Utilise Mooney as base currency for minting and auctioning NFTs.

NFT Marketplace

Enable users to buy, sell, and auction their minted NFTs.

Expanse Network Deployment

Deploy Mooney on Expanse to enable ultra low fees and fast transaction speeds.

Think Tank Integration

Bridge user interaction with the WAGMI research and education ecosystem.

# Roadmap

NFT Interoperability

Unifying cross-chain NFT platforms into the Mooney ecosytem, allowing users to interact, exchange, and mint NFTs on multplie platforms and currencies.

GDPR Compliance Protocol

Mooney will be enable NFTs, Minters and collectors to have their own marketplace which can interact with financial and art institutions, and mainstream media.

🔇 Crosschain rights protection

The redundency of NFT hashing on multiple chains prevents bad actors from stealing the rights to a physical asset due to insolvency or failure on the original host network.

VALT Protocol

Launch of a variable asset liquidity token. Details coming soon.

VAPOR Platform Launch

More details coming soon

#### **MUCH WOW**

#### WOWZA MOONEY IS A BANGER PROJECT AND DESERVES MUCH WOW.

- We have nice hair but also have people with no hair but who are also nice
- Most of our time is spent coding, much dev very hack
- You can mint NFT's and/or buy them
- Blockchain agnostic system coming soon
- We are great at conflict resolution
- We throw pool parties for Kenn Bosak
- We might be working on some stuff for the moon, literally
- We like airdrops, not token sales for our primary distribution method
- If you saw us in person you would think we were hobos

#### **Abstract**

This is an unstable and experimental technology and no one should buy this experimental code or invest in any way. Poor decision making and hubris are the foundational beliefs of the Mooney team and we in no way condone value being placed on Mooney and/or Mooney related products. Mooney is also not going to the moon because it is already there. As a core directive we are trying to get Mooney back to earth. The WAGMI Think Tank is purely a research and educational institution and in no way trying to disrupt or restructure the entire financial institution or liberate mankind from debt slavery
